REVIEW[®]
of Ophthalmology

Dear Doctor,

Review of Ophthalmology is pleased to offer you this preview of many exciting new products now available in the ophthalmic marketplace. Here, you'll learn about innovative new medications, diagnostic instruments, corrective lens options, in-office laboratory equipment and many other products. There are two ways to obtain more information on a particular product:

1. Go to www.reviewofophthalmology.com, click Supplements, Product Guide digital edition, and then follow the prompts.
2. Circle the corresponding number on the enclosed reader service card for each product of interest. Fill in your name and address, and return the postage-paid card to us.

Educational materials will be sent directly to you by the individual companies.
Thank you for your interest and support!

The New
Scanmate Flex

A-Scan / B-Scan / UBM

- Ophthalmic ultrasound platform that is configurable to all your examination needs
- Improved B-scan probe design for better reliability
- Utilizes AC or internal rechargeable battery power for portability
- Contact and Immersion A-Scan modes
- UBM capabilities with ClearScan[®]
- Area, angle and length measurement and annotation tools
- Easy export video, image and PDF files for EMR/EHR use

Product Guide

TOPCON ALADDIN BIOMETER / TOPOGRAPHER

The 9-in-1 Aladdin is a multi-functional instrument that combines a series of measurements to assist eye surgeons in the accurate calculation of IOL power. The built-in full Placido topography system offers all the additional diagnostic capabilities of any stand-alone topographer. New features of the Aladdin HW3.0 include Crystalline Lens Thickness, Central Corneal Thickness, ACD measured by Interferometry, Onboard Barrett and Olsen IOL Calculation Suites, and Abulafia-Koch Regression Formula for Toric IOL.

TOPCON CA-800 CORNEAL ANALYZER

The CA-800 Corneal Analyzer from Topcon gives you all the tools you need to accurately evaluate the anterior corneal surface. It features a Placido based corneal topographer that analyzes over 100,000 data points as well as meibomian gland imaging, dynamic pupillometry, tear film breakup, contact lens fitting and fluorescein video imaging. And, all this in an easy-to-use platform with an innovative 10.1" touch screen display.

TOPCON SL-D701 SLIT LAMP

The new SL-D701 Slit Lamp from Topcon features a bright and homogenous LED illumination source for enhanced observation of the eye structures. With its optional DC-4 Digital Photo Attachment, the SL-D701 can obtain clear and sharp still images of the eye as well as vivid color videos with remarkable resolution and detail. Basic EZ Capture software is provided with the DC-4 attachment. To further enhance the imaging results, the SL-D701 also features an optional BG-5 LED Background Illuminator that provides homogeneous adjustable illumination to the photographed areas of the anterior segment of the eye and allows for Meibomian gland observation and documentation.

TOPCON CV-5000S PHOROPTER

The CV-5000S Automated Phoropter sets new quality standards. The fast lens rotation provides comfort for both user and patient while the compact and contemporary design enhances the doctor's professional image. The CV-5000S provides a complete 21-point refraction and features the KB-50S One Dial Controller with a 10.4" color touch-screen display. Complete connectivity allows data to be sent automatically to every CV system throughout the office and populated automatically into the EMR, making paperless refraction a reality.

TOPCON TRC-NW400 NON-MYDRIATIC RETINAL CAMERA

The Topcon TRC-NW400 is a fully automated, easy-to-use, non-mydratic retinal camera that is designed to obtain high-resolution color images of the retina and the anterior segment of the human eye. It is equipped with automatic focusing and capture and a fully automated mechanism that moves the optical head from one eye to the other without operator intervention. The TRC-NW400 features a large 10" color touch screen and 9 internal fixation targets for wide-angle compositions of the retina. The TRC-NW400 can be used as a stand-alone unit or in conjunction with a remote server or EMR system. It is DICOM compliant and also available with the optional Topcon IMAGEnet digital imaging software.

TOPCON KR-1W WAVERONT ANALYZER

The 5-in-1 KR-1W Wavefront Analyzer from Topcon combines wavefront aberration, corneal topography, auto-refraction, keratometry, and pupillometry all in one unit! The system is extremely easy to operate, featuring auto alignment and measurement, a large color touch screen, and invisible light measurement for added patient comfort. The onboard evaluation software with multiple map displays provides valuable pre- and post-op data for cataract and refractive procedures. The system is fully networkable in various configurations.

OPHTHALMIC

Product Guide

Phoroptor® VRx

Digital Refraction System

The most advanced Phoroptor® ever.
Made in USA with only premium components.

Featuring the thinnest, most compact design, incredibly fast lens exchanges, motorized prisms, split cylinder lenses, and ultra-quiet operation, **Phoroptor® VRx** sets new standards in refraction. The ergonomic keypad features a multi-function control knob with unmatched feel and versatility, while the intuitive touch-screen interface has all the pre-programmed and programmable tests you'll need.

Phoroptor VRx boasts effortless integration with EMR systems, and unlike other digital refraction systems, is compatible with a comprehensive list of pre-test and acuity devices from both Reichert® and other leading manufacturers.

Made in the USA

Circle No. 17

Ultramatic RX Master™

Phoroptor®

Since 1921, the unmistakable feel of quality.

The original and world's finest refracting instrument. Phoroptor continues to be the industry standard after more than 90 years, offering its renowned mechanical quality and craftsmanship, optical quality, accuracy, and reliability.

Reichert **Ultramatic RX Master Phoroptor** and **Ultramatic RX Master Illuminated Phoroptor** are the only refracting instruments completely designed and manufactured in the United States. Each Phoroptor is made of 1,000 pieces, assembled by hand in our Buffalo, New York factory.

Ultramatic RX Master Illuminated Phoroptor features a patented, maintenance-free, cool-running, energy-efficient LED design.

Made in the USA

Circle No. 18

ClearChart® 4

Digital Acuity Systems

Pixel-perfect and purpose-built.

The all-new family of ClearChart® Digital Acuity Systems are elegant, all-in-one, simple-to-use, and uniquely designed to meet all of your acuity testing needs with a wide selection of optotypes, and other special test charts.

The **ClearChart 4** Digital Acuity System, **ClearChart 4X** Enhanced Digital Acuity System, and **ClearChart 4P** Polarized Digital Acuity System all feature a new 24 inch, high resolution, LED backlit display that are lightweight, cool running and long-lasting. The intuitive user interface provides the best user experience of any digital acuity chart.

Made in the USA

Circle No. 19

VisionChek™

Digital Exam Suite

The elements of refraction, featuring **SightChek™ Digital Phoroptor®**.

The all-new Reichert® **VisionChek™** Digital Exam Suite combines technology, simplicity, and value at the core of your exam, from the brand you've come to rely on most in refraction – Reichert! VisionChek includes all the options to get an entire digital exam lane up and running.

VisionChek Digital Exam Suite features:

SightChek™ Digital Phoroptor®

AcuityChek™ Digital Acuity Chart

OptoChek™ Plus Auto Refractor + Keratometer

LensChek™ Plus Digital Lensometer®

LensChek™ Pro Digital Lensometer® with PD + UV

Circle No. 20

LensChek™ Pro and LensChek™ Plus

Digital Lensometers

The elements of refraction. Combining technology, simplicity, and value.

The all-new **LensChek™ Pro** Digital Lensometer® with PD+UV and **LensChek™ Plus** Digital Lensometer® combine technology with simplicity at the core of your exam.

The new, compact, modern design and intuitive user interface offers the easiest lensmeter user experience available. For example, when the target is aligned with the correct optical center, readings can be automatically "locked-in" ensuring fast, repeatable, and reliable lens measurement. Both devices feature a brilliant 5.7 inch color LCD display.

LensChek Pro additionally features UV transmittance and PD measurement.

Circle No. 21

OptoChek™ Plus

Auto Refractor + Keratometer

The elements of refraction. Combining technology, simplicity, and value.

The all-new **OptoChek™ Plus** Auto Refractor + Keratometer, combines technology with simplicity at the core of your exam. The compact, modern design, and intuitive user interface of the OptoChek Plus offers the easiest user experience available for measuring objective spherical and cylindrical refractive errors as well as keratometry.

An innovative reliability index gives you confidence in obtained readings. Scotopic Pupil Size and Photopic Pupil Size modes adjust illumination to accommodate different lighting conditions. OptoChek Plus features a brilliant 5.7 inch color, touch LCD display, data output options, and a measurement range of Sphere: -30 D to +22 D, Cylinder: 0 D to ±10 D, Axis: 0° to 180°.

OPHTHALMIC

Product Guide

Ocular Response Analyzer® G3

Corneal Hysteresis: A more objective predictor of glaucoma progression.

Provide a more confident glaucoma risk assessment and a more personalized treatment approach.

Ocular Response Analyzer® is the only device that measures Corneal Hysteresis, a superior predictor of glaucoma progression. Corneal Hysteresis has consistently shown to be predictive of, or strongly associated with, glaucoma progression, and more powerfully so, than key indicators such as IOP and CCT.

CPT® Code 92145 for Corneal Hysteresis

Made in the USA 

Circle No. 23

CPT is a registered trademark of the American Medical Association

Reichert® 7CR and Reichert® 7

Non-contact Tonometers

The most advanced and the easiest to use.

In 1972, Reichert invented the non-contact tonometer (NCT), and after 45 years continues to offer the most accurate, trusted, and complete line of NCTs.

From the effortless one-button simplicity of Reichert® 7 to the clinically advanced Reichert® 7CR, which provides Corneal Compensated IOP (IOPcc), Reichert has a non-contact tonometer that suits your needs.

Made in the USA 

Circle No. 24

Tono-Pen®

Handheld Applanation Tonometers

Reichert® Tono-Pen® is the standard for handheld applanation tonometers, trusted by clinicians for over 30 years.

The advanced Tono-Pen AVIA® tonometer requires no daily calibration and is always ready-to-use. The ergonomic design and dual-sided displays make it ideal for left or right handed use. Tono-Pen is less sensitive to corneal centration, ensuring fast and accurate IOP measurements with minimal training.

Protect your Tono-Pen and patients with genuine, FDA cleared Reichert® Ocu-Film® + Tip Covers.

Made in the USA 

Circle No. 25

Ocu-Film® + Tip Covers

Tono-Pen® Tip Covers

Protect your Tono-Pen® Handheld Tonometer and your patients!

Genuine brand Ocu-Film + Tip Covers protect your Tono-Pen tonometers from dust and fluids, and help protect patients from the risks of cross contamination. Ocu-Film + Tip Covers are sanitized, easy to apply, and are the only Reichert® approved tip covers for use with Tono-Pen® Tonometers. The disposable, single use blue tip covers are available individually packaged in boxes of 150 or bulk packs of 600.

Circle No. 26

iPac®

Handheld Pachymeter.

Intuitive, inspired pachymetry.

Reichert® iPac® is the most feature-rich handheld pachymeter available. It offers Bluetooth® wireless connectivity, one-button navigation, a rotating color LCD screen, and a rechargeable lithium-ion battery.

iPac is backed by an industry-leading three-year warranty.

Made in the USA 

Circle No. 27

Xcel® Slit Lamps

Xcel® 455 and Xcel® 255

Where performance and value converge.

The Xcel® family of slit lamps offer high quality optics for image clarity and detail. Engineered for easy and smooth maneuverability, Xcel® Slit Lamps come in two traditional designs with 3 or 5 times magnification (within the range of 6X, 10X, 16X, 25X, and 40X) and multiple filter options including neutral density.

Reichert® CT100 and CT210 contact applanation tonometers are available to complement your choice of slit lamp.

MACUHEALTH WITH LMZ³ Circle No. 61

Containing all three critical carotenoids in our patented 10:10:2 formula, consisting of meso-zeaxanthin (10mg), lutein (10mg) and zeaxanthin (2mg), MacuHealth with LMZ³ is proven to quickly and effectively rebuild macular pigment.

A healthy macular pigment reduces oxidative stress, which helps protect photoreceptor cells from damage and reduces the risk of blindness later in life.

Supplementation with MacuHealth with LMZ³ will help enhance visual performance by reducing glare and improving contrast.

COMPUTERIZED READING ACUITY TEST – A KEY QUALITY OF LIFE FUNCTIONAL MEASURE

Whether you are assessing a patient's response to a refractive technology or a disease therapy, reading speed and reading acuity can provide valuable information about the quality of their vision. Remember! Reading acuity and Visual Acuity can be very different.

- Easy, economical and fast testing
- Ability to present sentences as small as 20/16 at 40cm
- Multiple languages
- Adjustable contrast and luminance
- 3 distance algorithms – near (40cm), computer (66cm) and intermediate (80cm)
- Randomized sentences to prevent familiarization

Product Guide

i.TERMINAL® 2 & i.TERMINAL® MOBILE BY ZEISS

i.Terminal 2 enables a premium patient experience.

- 60% faster than using manual measuring procedures
- 84% more accurate than a manual process.

Mobile centration is the modern way to capture your patient's individual fitting parameters.

- Can be used with any type of frame including large-sized sunglasses and sports frames
- Can integrate with EMR systems

i.PROFILER^{plus}® BY ZEISS

Ocular wavefront aberrometer, corneal topographer, autorefractor, and keratometer – all in one compact instrument.

- Includes i.Scription® by ZEISS software – Rx technology with ZEISS customized lenses
- Fully automated
- Binocular measurement in less than one minute
- Ocular wavefront measurement up to 7th order Zernike aberration
- Integration EMR and ZEISS Digital Refraction Systems
- Optional ATLAS® Review Software for advanced corneal topography

Product Guide

NEW MARCO ULTRA M SERIES OF SLIT LAMPS

The new Marco **Ultra M Series of Slit Lamps** not only introduces a new era of diagnostic observation, but completely changes the boundaries of conventional slit lamp design and performance. The **Ultra M Series** is an inspiring orchestration of the original Ultra Optics pedigree, highlighted by an elegant and intelligent design, progressive engineering, and functional flexibility. The new **Ultra M Series** from Marco truly represents the next generation slit lamp.

Other stand-out features include:

- Single-element, high-luminance LED illumination
- Patent-pending, built-in background illumination system
- Larger, 14 mm continuously variable aperture
- Fully integrated, low-voltage electronics conceals all hardware
- Expanded Patient chin rest access

ION IMAGING™ ANTERIOR SEGMENT SLIT LAMP IMAGING SYSTEM

Marco has redefined slit lamp imaging by combining a new intra-optics beam-splitter/camera adapter with the tremendous computing and imaging power of Apple-Technology. Together they create a highly sophisticated imaging system that emphasizes image quality, simplicity and efficiency. ION combines all of the bulky components (digital camera, adapter, computer, monitor, multiple cables, keyboard, mouse, etc.) of the traditional photo slit lamp, into one sleek, attractive all-in-one device, all at your fingertips, never having to leave the slit lamp. The "on-board" display utilizing our HIPAA compliant App allowing the user to export images to the Cloud or LAN for EMR integration. A system that you will want in every exam room, not missing the opportunity to capture, integrate and educate every diagnosis.

OPD-SCAN III WAVEFRONT ABERROMETRY

Beyond the ability to gather an autorefractometry, keratometry, pupillometry, corneal topography and wavefront aberrometry in ~10 seconds per eye, the OPD-Scan III adds over 20 diagnostic features never before integrated in one workstation.

- Angle Alpha and Kappa for multi-focal implants
- Retro illumination image displays cataracts, post-op toric IOL alignment, haptics, etc...
- SA of Cornea for Aspheric IOL selection
- Average Pupil Power for post LASIK calculations (APP on ASCRS IOL calculator)

Choosing the right IOL for your patients based on their visual system leads to better outcomes.

M3

THE WORLD'S FIRST COMBINATION UNIT WITH NCT – THE MARCO M3®

The M3 from Marco is a combination automatic refractor, keratometer and non-contact tonometer. The M3 uses a highly sensitive CCD camera, which creates high-quality images for accurately measuring patients with cataracts, corneal opacities, IOLs and post-Lasik cases. Other features include automated eye alignment, auto-fogging system, tilt screen, motorized chinrest and new ergonomic design. The M3 easily integrates with other Marco refraction systems.

THE EPIC AUTOMATED REFRACTION SYSTEM

The EPIC is our most innovative space- and time-saving combined workstation to streamline operations, grow your business and increase patient satisfaction. Marco has successfully installed thousands of automated refraction systems. Each receives the Marco certified implementation process that guarantees the efficiency and productivity to make your practice more successful. The EPIC delivers:

- Color, touch & tilt-screen for near testing
- Facilitated testing and target fixation
- One-touch toggle for "Quick Refract" sequence
- Intelligent cross cylinder
- Three contrast and glare-testing modes
- 4' x 5' footprint
- EMR integration

MARCO TRS-5100 DIGITAL REFRACTION SYSTEM

The TRS-5100 is controlled with a programmable remote keypad, and delivers refractions in a fraction of the time it takes with traditional methods. The time saved provides more time for patient consults and optical. It allows the patient to simultaneously view their old and new Rx selections including day and night vision differences. The TRS-5100 also makes your life physically easier and more efficient – while giving patients a faster, more accurate, and positive exam experience. This refraction process increases staff efficiency, maximizes patient flow, and increases overall practice revenue and referrals. The TRS is equipped with "Marco Connect" SM software and is EHR/EMR compatible.
