Dear Doctor,

Review of Ophthalmology is pleased to offer you this preview of many exciting new products now available in the ophthalmic marketplace. Here, you’ll learn about innovative new medications, diagnostic instruments, corrective lens options, in-office laboratory equipment and many other products. There are two ways to obtain more information on a particular product:

2. Circle the corresponding number on the enclosed reader service card for each product of interest. Fill in your name and address, and return the postage-paid card to us. Educational materials will be sent directly to you by the individual companies.

Thank you for your interest and support!

--

Keeler 40H Goes Digital
The Q series 40H Digital and Digital Ready Slit Lamp comes with many additional features over and above the 40H K series Slit Lamps. As well as benefiting from the combined integrated camera and beam splitter (optional for the Digital Ready version), additional Slit Lamp features include a background illuminator, auxiliary diffuser, blue filter and camera and review control buttons mounted on the dashboard area. Add our Kapture Software Packages. Kapture Lite is a stand-alone system including still capture with live preview, patient data base, image processing, import and export, much more.

Avenova with Neutrox (pure hypochlorous acid) removes microorganisms and debris from the lids and lashes. Avenova is an ideal addition to any daily lid and lash hygiene regimen, including usage by patients with blepharitis and dry eye. Avenova may also be used after make-up removal as well as pre- and post-contact lens wear. Visit www.avenova.com for more information.

BioOptix

You are focused on healing.
We are focused on improving your surgical experience.

BioOptix is a dehydrated, extracellular membrane allograft derived from human amniotic tissue that is intended for use as a scaffold for ocular tissue repair and regeneration.

CONVENIENT
For use in the inpatient, outpatient, and clinic setting. No refrigeration required.

PERFORMANCE
Adheres without adhesives or glue to sclera and conjunctiva when applied to stromal surface.

AVAILABLE
In multiple sizes to fit your needs.

BioOptix, LLC | 1-877-675-4169 | biooptix.com

Requesting product information is now fast and easy! Go to www.reviewofophthalmology.com, click Supplements, Product Guide digital edition and follow the prompts to request product information.
The new KR-800S Auto Kerato-Refractometer incorporates Topcon’s Rotary Prism technology for unparalleled accuracy and consistent measurements. It features several new tests, including visual acuity (VA) check for near and far distance, contrast sensitivity testing and glare testing, allowing you to confirm objective and subjective VA under glare conditions before cataract surgery. The compact and user-friendly design provides quick and accurate readings with minimal training required.

The CA-800 Corneal Analyzer from Topcon gives you all the tools you need to accurately evaluate the anterior corneal surface. It features a Placido based corneal topographer that analyzes over 100,000 data points as well as meibomian gland imaging, dynamic pupillometry, contact lens fitting and fluorescein video imaging. And, all this in an easy-to-use platform with an innovative 10.1” touch screen display.

The CA-800 Corneal Analyzer from Topcon gives you all the tools you need to accurately evaluate the anterior corneal surface. It features a Placido based corneal topographer that analyzes over 100,000 data points as well as meibomian gland imaging, dynamic pupillometry, contact lens fitting and fluorescein video imaging. And, all this in an easy-to-use platform with an innovative 10.1” touch screen display.

The KR-1W Wavefront Analyzer from Topcon combines wavefront aberration, corneal topography, auto-refraction, keratometry, and pupillometry all in one unit! The system is extremely easy to operate, featuring auto alignment and measurement, a large color touch screen, and invisible light measurement for added patient comfort. The onboard evaluation software with multiple map displays provides valuable pre- and post-op data for cataract and refractive procedures. The system is fully networkable in various configurations.

The circular view of a slit lamp from Topcon showing both the LED illumination source and the optional BG-5 LED Background Illuminator that provides homogeneous adjustable illumination to the photographed areas of the anterior segment of the eye and allows for Meibomian gland observation and documentation.

The CV-5000S Automated Vision Tester sets new quality standards. The fast lens rotation provides comfort for both user and patient while the compact and contemporary design enhances the doctor’s professional image. The CV-5000S provides a complete 21-point refraction and features the KB-50S One Dial Controller with a 10.4” color touch-screen display. Complete connectivity allows data to be sent automatically to every CV system throughout the office and populated automatically into the EMR, making paperless refraction a reality.

And, all this in an easy-to-use platform with an innovative 10.1” touch screen display.

The new SL-D701 Slit Lamp from Topcon features a bright and homogenous LED illumination source for enhanced observation of the eye structures. With its optional DC-4 Digital Photo Attachment, the SL-D701 can obtain clear and sharp still images of the eye as well as vivid color videos with remarkable resolution and detail. Basic EZ Capture software is provided with the DC-4 attachment. To further enhance the imaging results, the SL-D701 also features an optional BG-5 LED Background Illuminator that provides homogeneous adjustable illumination to the photographed areas of the anterior segment of the eye and allows for Meibomian gland observation and documentation.

**TELLER ACUITY CARDS® II**

Features Include:
- Clinically validated
- Digitally printed test cards
- No edge artifacts
- Scientifically established norms

16 cards measuring acuities 20/30 to 20/3200 using square wave gratings

Stereo Optical • (800) 344-9500
www.StereoOptical.com

**VISION TESTING PRODUCTS**

- Digital corneal reflection pupilometer — precise and digital PD measurements.
- Original Ishihara Color Test
- Color perception test for red-green color deficiencies, 14 plates.

*We also offer Trial Frames & a Large Trial Lenses Box containing 260 lenses, 22 mm aperture.*

**TOPCON SP-1P SPECULAR MICROSCOPE**

Topcon’s fully automatic SP-1P Specular Microscope is designed to photograph and analyze the corneal endothelium. The SP-1P, with its “Panorama” function, can capture an area 2.6 times larger than the conventional capture field. Its compact footprint and rotatable control panel save time and space. The incorporated firmware provides cell density, corneal thickness, percentage of hexagonality and more. Topcon’s compact approach makes the SP-1P the next generation in Specular Microscopy.

Topcon Medical Systems • (800) 223-1130

**TOPCON PASCAL® SYNTHESIS™ PATTERN SCANNING LASER WITH ENDPOINT MANAGEMENT™**

The Topcon PASCAL® Pattern Scanning Laser Systems are renowned for their precision, ease of use and enhanced patient comfort. The PASCAL® method of photocoagulation allows physicians to control the precision, safety and efficiency of the laser procedure, while optimizing patient comfort and convenience.

Topcon offers the PASCAL® Synthesis™ Series, Topcon’s premiere dual-port pattern scanning retinal laser, available in both 532nm and 577nm wavelengths. The optional Endpoint Management™ software with Landmark Patterns™ allows for less-damaging sub-threshold treatment of a variety of retinal disorders.

QUANTIFEYE® MPS II
The Next Generation in Macular Pigment Measurement
The next generation in macular pigment measurement just got even better! The new QuantifEye MPS II offers the same accurate and reliable technology that you have come to know and trust, but now in a tablet design for a smaller footprint! The QuantifEye MPS II features scientifically-validated software, plus these additional benefits:
• Unsurpassed patient and technician usability with a Data Quality Index (DQI)
• Significantly faster testing-time in the lane with enhanced features and user-interface
• Intuitive workflow with multiple reports
Contact us today for more information, and to find out how you can get a 60-day, risk free evaluation for your practice!

HUWITZ AUTO LENSMEETER WITH BLUE LIGHT HAZARD MEASUREMENT FUNCTION | HLM 9000
One of a kind, the Huvitz Auto Lensmeter HLM-9000 measures the harmful effects of LED screens by utilizing the Blue Light Hazard Measurement function, creating a proficient practice. Features include:
• Full compatibility with all EMR Systems
• Wavefront Analysis Technology of Hartmann Sensor
• Wireless Communication
• Improved Accuracy with Green Light Beam
• UV Measurement
• Wide Tilting Angle
• Intuitive Prism Direction
• Simple GUI

EYEPROMISE® NUTRACEUTICALS
What Your Eyes Need Most
EyePromise offers science-based, doctor-recommended nutraceuticals for supporting eye health. With more than 55-million doses consumed and counting, EyePromise products are made in the U.S.A. from the highest-quality, natural ingredients. Backed by an unconditional 60-Day, Money-Back Guarantee, EyePromise is the ONLY brand Guaranteed to Increase MPDO (Macular Pigment Optical Density)! Our product line is comprised of the following:
• Macular Health Formulas (6)
• Dry Eye and Contact Lens Comfort Formula
• Retinal Health Formula
• Vision Performance Formula
Contact us today for more information on any of our nutraceuticals and how they can help benefit your practice!

HUWITZ AUTO REF/KERATOMETER WITH MEIBOMIAN GLAND & TFBUT FUNCTIONS | HRK-9000A
The exceptional HRK-9000 offers the first Contact Lens Fitting Guide with color camera, Meibomian Gland Analysis and Tear Film Break Up Time (TFBUT) measurement functions. Features include:
• Contrast Sensitivity & Glare Test
• Wavefront Technology
• Wireless Communication
• Anterior Segment Pictures & export to PC
• Peripheral Keratometry Measurement
• IOL Mode
• Iris & Pupil Diameter Measurement
• Efficient Contact Lens Prescription
• Micro Lens Array

HAI SL-5000e Elevate Slit Lamp

Introducing the HAI SL-5000e Elevate, the world’s first slit lamp specifically designed and engineered from the ground up to meet the challenge of examining plus-sized patients and patients with limited mobility.

Features:
- American quality design and engineering
- Premium German-made optics
- Superior image clarity through precision alignment
- Five levels of magnification from 4x-40x
- Reduced strain and improved comfort

HAI CL-1000eva Endothelium Viewing Attachment

The HAI CL-1000eva converts many compatible slit lamp into a specular microscope, providing a high-magnification view of endothelial cells with software that performs automatic image capture, frame selection, enhancement and analysis.

Features:
- Live image of endothelium
- Auto select and enhance images
- Analyze cell density, area & morphology

HAI SL-5000 Series Slit Lamps

SL-5000ba Basic:
- 10x-16x 2-step mag
- 0.9mm iris aperture
- Available for $1,900

SL-5000s Standard:
- 6x-40x 5-step mag
- 0.9mm iris aperture
- Available for $2,980

SL-5000p Plus:
- 6x-40x 5-step mag
- 0.25mm iris aperture
- Available for $4,995

Affordable and versatile, HAI slit lamps are precision-aligned for remarkable image quality, featuring imported German optics for increased clarity and depth of focus. Standard and Plus models are available with live-streaming digital video camera.

HAI CL-1000nc Non-Contact Specular Microscope

The CL-1000nc is quick and easy to use, capturing endothelial cell images automatically without needing to click any buttons during target acquisition. The software provides quick reference data for cell density, coefficient of variation and hexagonal percentage within seconds. Its non-contact design makes the procedure comfortable for patients and efficient for busy practices. Rent from $385/month!

HAI SL-5000h Handheld Slit Lamp

Bring your slit lamp anywhere you go with the SL-5000h, a rugged and lightweight solution for eye care practitioners on the move.

Features:
- 10x and 16x magnification (built-in switch)
- 0.12mm slit aperture
- Heat absorption, natural, cobalt and red-free filters
- Comes with hard-cover travel case
- Autorefractor, keratometer, lensmeter, pachymeter, ultrasound

HAI Exam Lane Packages

Brought to you by the experienced team behind HAI Labs, HAI Ophthalmic is your new one-stop shop to buy, rent or lease premium exam lane and diagnostic equipment from brands you know and trust, without the hefty price tags.

- 54OPTIC exam chairs and stands
- HAI slit lamps and LED vision charts
- Tomey autorefractors, keratometers, lensmeters, pachymeters, ultrasounds

Packages starting from $12,850
CM 900®
The perfect image every time

The CM 900 is available on and retrofits to any existing BP 900 LED or BD 900 Slit Lamp. Freeze technology allows you to shoot the perfect image every time. Identify the shot area, and click. Digital video capture automatically begins. Depress the hands-free footswitch to shoot. Review on the monitor, choose from images before and after you clicked, pick the best shot.

Reliance FX 920®
The new standard for chair design

The FX 920 sets a new standard for design while retaining the core value of all Reliance products - rugged durability. All surfaces of the chair are designed to support a patient’s entire weight. Ergonomic full power tilt is efficient for the practitioner and comfortable for the patient. A full complement of controls is available on both sides of the chair, while the detached dual footswitch adds flexibility.

Reliance Xoma® Exam Room System
All-In-One: Fully-Functional, Ergonomic, Adjustable, Ultra Efficient

XOMA is a NEW unique & beautifully designed all-in-one patient positioning & instrument delivery system. It’s exciting design displays stunning lines while maximizing efficiency through extraordinary functionality. XOMA: the future of exam room equipment from Reliance.

TONOSAFE® Tonometry Prisms
Speed up exams. Cut infection risk.

Tonosafe disposable prisms eliminate the risk of cross-infection. They easily snap over the tips of the Goldmann applanation tonometers, or Perkins tonometers. The prisms are developed for single patient use and only take a moment to position. Calibrated to Goldmann standards, the Tonosafe is the same mass as the Goldmann prism so no conversion of results is necessary.

LENSTAR® APS Optical Biometer
Advanced biometry – better outcomes

The new LENSTAR LS 900 with Automated Positioning is all you need for faster, more efficient biometry. Its easier mechanical tracking minimizes user delay and error, delivering more reliable results and a more comfortable patient experience. The dual zone keratometry with 32 measurement points provide precise K values, essential for planning toric lens implantation. With its integrated Olsen and Barrett formulas, two of the latest generation multivariable IOL calculation methods, the LENSTAR provides the user with the best possible IOL prediction.
BQ 900® LED Slit Lamp
Fully integrated imaging solution
Choose the BQ 900 LED for advanced microscopy. The IM 900 imaging module offers a fully integrated imaging solution with unique features and technology. Select accessories such as a teaching scope, inclined eyepieces, a Goldmann tonometer or the stereo variation for the retinal specialist. The convergent view of the BQ 900 LED offers a large binocular field with high resolution and depth of focus.

BM 900® Slit Lamp
The class slit lamp microscope–enduring performance
The Haag-Streit BM 900 has been the standard in modern slit lamp microscopy for almost 50 years – and still is! Over 100,000 professionals all over the world who own a BM 900 agree that it was the best investment they ever made for their practice. The BM 900 offers convergent optics for brilliant views as well as two “workhorse” magnifications of 10x and 16x. The short observer to patient distance and excellent optics guarantees fatigue free daily use. It has the brightest illumination available on a slit lamp and supplies LED-Power for more details.

Octopus 300®
Early diagnosis and standard white-on-white perimetry in one device
The Octopus 300 with EyeSuite Progression Platform provides a networkable and EMR ready solution (Pro model with EyeSuite) for all your perimetry needs. The Octopus 300 is capable of performing a 2½ minute full-threshold test with Haag-Streit’s Tendency Oriented Perimetry strategy. And with unique eye tracking and fixation control, worries about reliability due to fixation losses are over. All perimetric data can be accessed remotely from unlimited viewing stations with choice of regression base line change along with real time interactive access to patient results.

BD 900® Slit Lamp
Ideal for fitting contacts
The BD 900 is optimized for the optometrists and ophthalmologists specializing in the anterior segment. It is also ideal for fitting contact lenses and for doctors in emergency room, who are not ophthalmologists. Optional video fits through a built-in port. Standard magnification adjusts from 10 to 16x times via a lever placed just beneath the microscope.

Octopus 600®
Early diagnosis and standard white-on-white perimetry in one device
The Octopus 600 with EyeSuite Progression Platform extends Haag-Streit’s product range of visual field analyzers combining the Pulsar method for early glaucoma detection and standard White/White perimetry for long term follow-up in one compact and stand alone device. Unique fixation controls for blinking, pupil position, darting and forehead control contact yields higher reliable results and, with our Tendency Oriented Perimetry strategy, thresholds are performed in 2½ minutes.

Octopus 900®
Versatility PLUS connectivity!
The Octopus 900 with EyeSuite Progression Platform is the most versatile perimeter available. The Octopus 900 features static White/White, Blue/Yellow, Red/White, Flicker, Low Vision testing and computer-assisted true Goldmann Kinetic. The Octopus 900 also includes EyeSuite—the industry’s most advanced software for progression analysis - including the first perimetric analysis to combine structure and function with real-time interactive access to all perimetric data.
OPHTHALMIC
Product Guide

VX 55 – DIGITALIZED MANUAL PHOROPTER
A new type of digital phoropter that features the simplicity and comfort of a manual refractor. Enjoy effortless efficiency without changing the way you work.

• Control the entire refraction process with a tablet, including charts display
• Built in LED lighting offers safe illumination at the touch of a button
• Guided interactive tutorial screen
• The VX 55 is able to communicate with other devices and input measurement data into HER
• Give your patients the “wow” factor with new technology

Visionix ▲ (800) 292-7468
www.visionix.com

VX 110 – FULLY AUTOMATED WAVEFRONT BASED ARK/TOPO/ABERROMETER
Wavefront technology allows for more precise refraction and a better “starting point” for your exams.

• Auto tracking and focusing
• Features 4 types of automatic and simultaneous measurements
• Topography up to 100,000 points
• High density aberrometry with up to 1,500 measurement points
• Precise contact lens fitting with built-in lens database
• Acuity simulations according to pupil diameter
• Measurement of accommodation through aberrometry
• Useful data for “guided” refractive surgery

Visionix ▲ (800) 292-7468

Keeler Cryomatic
The Standard in Cryo-Surgery

The Keeler, CryoMatic is the first ophthalmic cryo-system with cryosmart technology. The console has a built-in monitoring system which self-adjusts the optimal operating parameters for any given probe. The CryoMatic offers the surgeon and his staff a system which performs time after time.

- Disposable & Reusable Probes.
- Automatic Gas Adjustment, any probe will perform optimally.
- Fast Freeze and Defrost, for ease of use.
- No manual adjustments, easy set-up.

•  Color, touch & tilt-screen for near testing

Marco has redefined slit lamp imaging by combining

highly sophisticated “mainstream” imaging system that emphasizes image quality, simplicity and efficiency. Ion combines all of the bulky components (digital camera, adapter, computer, monitor, multiple cables, keyboard, mouse, etc.) of the traditional photo slit lamp, into one sleek, attractive all-in-one device, all at your fingertips, never having to leave the slit lamp. The “on-board” display utilizing our HIPPA compliant App allowing the user to export images to the Cloud or LAN for EMR integration. A system that you will want in every exam room, not missing the opportunity to capture, integrate and educate every diagnosis.

If there ever was a “game-changer” in overall slit lamp design, the Marco Ultra G5 Slit Lamp is it!

A sophisticated blend of optical efficiency and production quality, the GS is a true powerhouse in a comprehensive line of premier slit lamps. With a wider field of view, enhanced light transmission, and a greater depth of field, the GS delivers a more precise and comfortable viewing experience. When it comes to engineering and building a slit lamp for today’s demanding practitioner . . . your focus has always been our focus.

MACUHEALTH® WITH LMZ³

Containing all three critical carotenoids in our patented 10:10:2 formula, consisting of meso-zeaxanthin (10mg), lutein (10mg) and zeaxanthin (2mg), MacuHealth with LMZ³ is proven to quickly and effectively rebuild macular pigment.

A healthy macular pigment reduces oxidative stress, which helps protect photoreceptor cells from damage and reduces the risk of blindness later in life.

Supplementation with MacuHealth with LMZ³ will help enhance visual performance by reducing glare and improving contrast

LACRIPURE SALINE SOLUTION

Introducing LacriPure — the only FDA-approved rinsing and insertion saline solution.

Indicated for use with soft, hybrid and rigid gas permeable lenses, LacriPure is a sterile, non-preserved saline which provides an excellent alternative to tap water rinsing.

Packaged in a 5ml unit-dose vial, LacriPure has been approved as a scleral lens insertion solution, providing an on-label solution for exceptional safety and convenience.

Ophtalmic Product Guide
Veatch Ophthalmic Instruments is committed to finding the best fit for your practice needs. Utilizing our consultative approach we work with you to help you build the perfect examination package to outfit your exam lane. Whether you are looking for an economical option or top of the line, contact your Veatch Sales Consultant today to create your perfect lane package.

- Packages starting at $12,995

**Veatch Lane Packages**

**Digital Eye Exam**

The complete Digital Eye Exam is made possible with our refracting technology. Fewer “which is better 1 or 2” questions reduces your patients’ confusion, and provides a superior exam experience. No more tired shoulders and backache at the end of the day. Enhance your refracting; provide better vision for your patients and Go digital!

- Reduce stress and strain
- Increase patient throughput
- Increase revenues
- Patient WOW factor!

**ReseeVit™ Evolution**

ReSeeVit™ has been the industry leading imaging software suite since 1992. What began as a single device to “store and forward” anterior segment images has grown into the most complete suite of digital imaging products available on the market. Modules include: Anterior Segment, Retina, Endothelium and WaveFront corneal topography.

- Robust EMR Integration
- IHE (Integrating the Health Enterprise) certified
- DICOM Compliant with full IHE Workflow
- Linear Measurement Capabilities in millimeters
- Video and Still Image Capture
- Integrated Interpretation and Report imbedded into exam
- Cup to Disc Measurement

**InSight Visual Acuity System**

The InSight Visual Acuity System is an innovative solution to your acuity needs. It's the first LCD Acuity that does not require a PCI. Not only do you get all your standard charts & tests, but the system includes animation. The charts can be set to randomize for patients who may have memorized the chart. In addition, you now have the option of a static chart, this chart presents the same opto types from your typical manual projector and does not randomize.

**LightSpeed Lensmeter**

The Yeasn LightSpeed Auto Lensmeter is true wavefront for optimal performance. The built-in Hartmann Shack sensor and Green LED light capture provide the highest of accuracy. The Green LED technology eliminates errors due to varying abbe values. The unique parallel processor provides amazingly fast data guaranteed in under 50ms! The LightSpeed is a full service Auto Lensmeter at an affordable price.

- Compact Lens Table
- Hartmann Shack Wavefront Technology
- Parallel Processor
- Adjustable LCD Touchscreen for ease of use
- Auto Lens Detection — Single, Multifocal, Progressive
- Large Prism Range
- Built In PD, UV and Printer

**Potec PRK-7000L Auto Ref/Ker**

The NEW Potec PRK-7000L Auto Refractor/Keratometer provides reliable and accurate measurements. The Auto Fire mode makes capturing data fast and simple. Designed with a color LCD touch screen and compact design for any practice. Efficient, Precise and Affordable!

- Easy to use
- Auto Fire Mode
- CLBC measurement
- PD Measurement
- IOL Mode
- 2 Year Warranty

**Patient Education: Image Album**

(to be updated)

**Media Package - including Video (Finding Nemo)**

**Calibration for 3'-22'**

SAY GOOD-BYE TO PATCHING
Amblyz™ glasses represent a totally new approach in eye occlusion. They are easy to use, comfortable, suited for children from 3 to 10 years of age. Using electronically controlled intermittent occlusion embedded within the device, Amblyz™ glasses occlude without the discomfort, anxiety and stigma associated with an eye patch. Amblyz™ glasses can be sent to an optician to be fitted with correction lenses. The glasses feature a kid-friendly, unisex design. The inner lining is made of soft rubber to ensure fit and comfort for all-day wear. The device runs on rechargeable batteries, and needs to be connected to a power supply to recharge.

TOPCON TRC-NW400 NON-MYDRIATIC RETINAL CAMERA
The Topcon TRC-NW400 is a fully automated, easy-to-use, non-mydriatic retinal camera that is designed to obtain high-resolution color images of the retina and the anterior segment of the human eye. It is equipped with automatic focusing and capture and a fully automated mechanism that moves the optical head from one eye to the other without operator intervention. The TRC-NW400 features a large 10" color touch screen and 9 internal fixation targets for wide-angle compositions of the retina. The TRC-NW400 can be used as a stand-alone unit or in conjunction with a remote server or EMR system. It is DICOM compliant and also available with the optional Topcon IMAGEnet® 5 digital imaging software.

BAUSCH + LOMB BIOTRUE® ONE DAY CONTACT LENSES

The daily disposable that starts and ends the day with more moisture1.

- Maintains more than 98% of its moisture throughout the day for up to 16 hours2
- The enriched surface forms a dehydration barrier to maintain moisture and shape2,3
- Crisp, clear vision – all day and into the night with Aspheric Optics

Offer your patients Biotrue® ONEday today.

2. Twenty-two subjects participated in a randomized, double masked, contralateral eye study to evaluate water loss of Biotrue ONEday, 1-Day Acuvue Moist, 1-Day Acuvue TruEye contact lenses. After 4, 8, 12, and 16 hours of wear, lenses were removed and immediately weighed (wet weight). The lenses were then completely dried and reweighed (dry wet). The percent water loss was then calculated for each lens from the wet and dry weights.
3. Results of in vitro study in which Biotrue ONEday, 1-Day Acuvue Moist, Ciba AquaComfort Plus, and 1-Day Acuvue TruEye lenses were placed on a model cornea with 0.00 µm of spherical aberration. Images were acquired every 10 seconds up to 180 seconds and analyzed using pattern matching algorithms. A score for each 10-second interval is determined by comparing how closely the test image matches the time 0 image. Mean scores over the 180-second interval were determined and compared.
