Dear Doctor,

Review of Ophthalmology is pleased to offer you this preview of many exciting new products now available in the ophthalmic marketplace. Here, you’ll learn about innovative new medications, diagnostic instruments, corrective lens options, in-office laboratory equipment and many other products. There are two ways to obtain more information on a particular product:

2. Circle the corresponding number on the enclosed reader service card for each product of interest. Fill in your name and address, and return the postage-paid card to us. Educational materials will be sent directly to you by the individual companies.

Thank you for your interest and support!

Requesting product information is now fast and easy! Go to www.reviewofophthalmology.com, click Supplements, Product Guide digital edition and follow the prompts to request product information.
TOPCON ALADDIN BIOMETER / TOPOGRAPHER
One step ahead in conventional and premium IOL calculation.

- Combined comprehensive biometry and topography
- Latest IOL calculation formulas on board
- Enhanced cybersecurity

LensChek™ Pro Additionally features UV 5.7 inch color LCD display. measurement. Both devices feature a brilliant ensuring fast, repeatable, and reliable lens readings can be automatically “locked-in” target is aligned with the correct optical center, experience available. For example, when the user interface offers the easiest lensmeter user interface your exam.

The new, compact, modern design and intuitive simplicity at the core of your exam. The

user experience of the OptoChek™ Plus offers

Combining technology, simplicity, and value.

The all-new OptoChek™ Plus Auto Refractor + Keratometer, combines technology with simplicity at the core of your exam. The compact, modern design, and intuitive user interface of the OptoChek™ Plus offers the easiest user experience available for measuring objective spherical and cylindrical refractive errors as well as keratometry.

An innovative reliability index gives you confidence in obtained readings. Scotopic Pupil Size and Photopic Pupil Size modes adjust illumination to accommodate different lighting conditions. OptoChek™ Plus features a brilliant 5.7 inch color LCD display, data output options, and a measurement range of Sphere: -30 D to +22 D, Cylinder: 0 D to ±10 D, Axis: 0° to 180°.

Phoroptor® VRx

Digital Refraction System

A premium refraction experience from the most advanced Phoroptor® ever.

The all-new family of ClearChart® Digital Acuity Systems are elegant, all-in-one, simple-to-use, and uniquely designed to meet all of your acuity testing needs with a wide selection of optotypes, and other special test charts. The ClearChart® 4 Digital Acuity System, ClearChart® AX Enhanced Digital Acuity System, and ClearChart® 4P Polarized Digital Acuity System all feature a new 24 inch, high resolution, LED backlit display that are lightweight, cool running and long-lasting. The intuitive user interface provides the best user experience of any digital acuity chart.

ClearChart® 4

Digital Acuity Systems

Pixel-perfect and purpose-built.

SightChek™

Digital Phoroptor®

Combining technology, simplicity, and value.

The Phoroptor® Company, for the best possible refraction experience.

SightChek™ enables you to bring the power of digital refraction into your practice at an affordable price.

For over 90 years, Phoroptor® has been at the heart of your exam lane. Trust Reichert®, The Phoroptor® Company, for the best possible refraction experience.
Ocular Response Analyzer® G3  
Corneal Hysteresis: A more objective predictor of glaucoma progression.
Provide a more confident glaucoma risk assessment and a more personalized treatment approach.
Ocular Response Analyzer® is the only device that measures Corneal Hysteresis, a superior predictor of glaucoma progression. Corneal Hysteresis has consistently shown to be predictive of, or strongly associated with, glaucoma progression, and more powerfully so, than key indicators such as IOP and CCT.
CPT® Code 92145 for Corneal Hysteresis

Reichert® 7CR and Reichert® 7  
Non-Contact Tonometers
The most advanced and the easiest to use.
In 1972, Reichert® invented the non-contact tonometer (NCT), and after 45 years continues to offer the most accurate, trusted, and complete line of NCTs.
From the effortless one-button simplicity of Reichert® 7 to the clinically advanced Reichert® 7CR, which provides Corneal Compensated IOP (IOPcc), Reichert has a non-contact tonometer that suits your needs.

Tono-Pen®  
Handheld Tonometers
Reichert® Tono-Pen® has been the trusted choice of clinicians for over 30 years.
Introducing Tono-Pen AVIA® applanation tonometer now with Quick-Tap™ Measurement Mode. The same ready-to-use, calibration-free, and accurate operation – now with more confidence in fewer measurements – making Tono-Pen AVIA® the most advanced Tono-Pen® yet.
Tono-Pen® is less sensitive to corneal centration, ensuring fast and accurate IOP measurements with minimal training.
Protect your Tono-Pen and patients with genuine, FDA cleared Reichert® Ocu-Film® + Tip Covers.

Ocu-Film® + Tip Covers  
Tono-Pen® Tip Covers
Protect your Tono-Pen® Handheld Tonometer and your patients!
Genuine brand Ocu-Film® + Tip Covers protect your Tono-Pen® tonometers from dust and fluids, and help protect patients from the risks of cross contamination. Ocu-Film® + Tip Covers are sanitized, easy to apply, and are the only Reichert® approved tip covers for use with Tono-Pen® Tonometers. The disposable, single use blue tip covers are available individually packaged in boxes of 150 or bulk packs of 600.

iPac®  
Handheld Pachymeter.
Intuitive, inspired pachymetry.
Reichert® iPac® is the most feature-rich handheld pachymeter available. It offers Bluetooth® wireless connectivity, one-button navigation, a rotating color LCD screen, and a rechargeable lithium-ion battery.
iPac® is backed by an industry-leading three-year warranty.

Xcel® Slit Lamps  
Xcel® 455 and Xcel® 255
Where performance and value converge.
The Xcel® family of slit lamps offer high quality optics for image clarity and detail. Engineered for easy and smooth maneuverability, Xcel® Slit Lamps come in two traditional designs with 3 or 5 times magnification (within the range of 6X, 10X, 16X, 25X, and 40X) and multiple filter options including neutral density.
Reichert® CT100 and CT210 contact application tonometers are available to complement your choice of slit lamp.

JOIN LEADING EYE CARE PROFESSIONALS TO OPTIMIZE VISION AND REDUCE RISK OF MACULAR DISEASE

MacuHealth's Advanced Formulation is the MOST RESEARCHED FORMULATION IN THE WORLD

• Increase all three serum carotenoids
• Enrich macular pigment density and volume across the spatial profile
• Significantly improves contrast sensitivity of 6 cpd
  o In healthy patients
  o Cataract patients
  o Patients with macular disease
• Vehid luminance and glare reduction
• Faster photo stress recovery
• Improved dark adaptation
• Faster critical flicker fusion – ability to see higher frequency flicker
• Better coincidence anticipation – for better hand-eye coordination and faster decision making

Use evidence-based science to improve patient outcomes

Eye Doctor Plus Moist Heat Mask:
Now our moist heat compresses are made with antimicrobial material!
1. The shape of the mask is designed to fit any size face comfortably.
2. This is the only moist heat mask that can be heating in the microwave and oven
3. 20 to 30 seconds on “high” in the microwave gives off 10 to 12 minutes of soothing moist heat.
4. Has a removable cover for easy washing & drying, can be used within 2 hours.

BQ 900® LED Slit Lamp
Fully integrated imaging solution
Choose the BQ 900 LED for advanced microscopy. The BQ 900 is powered by a long-lasting LED diode that offers exceptional detail and depth of field. It is the ultimate slit lamp due to its flexible modular design. The IM 900 imaging module offers a fully integrated imaging solution with unique features and technology. Other optional accessories include Teaching Scope, Inclined Eyepieces, Yellow Filter, Stereo Variator, and Beam Splitter.

BI 900® LED Slit Lamp
Simplified operation meets high reliability.
Equipped with an improved version of the BM 900 microscope, an enhanced illumination system and traditional high-precision mechanics, the BI 900 is the ideal successor to the BM 900. The BI 900 slit lamp combines simplicity and reliability in a modern system which offers integrated digital imaging as an option.

Reliance FX-920®
The standard for chair design
The FX-920 sets the standard for design while retaining the core value of all Reliance products - rugged durability. All surfaces of the chair are designed to support a patient’s entire weight. Ergonomic full power tilt is efficient for the practitioner and comfortable for the patient. A full complement of controls is available on both sides of the chair, while the detached dual footswitch adds flexibility.

LENSTAR® APS Optical Biometer
Advanced biometry – better outcomes
The LENSTAR LS 900 with Automated Positioning is all you need for faster, more efficient biometry. Its easy mechanical tracking minimizes user delay and error, delivering more reliable results and a more comfortable patient experience. The dual zone keratometry with 32 measurement points provide precise K values, essential for planning toric lens implantation. With its integrated Olsen and Barrett formulas, as well as exclusive availability of the HIL-RBF Method 2.0 for IOL calculation, the LENSTAR provides the user with the best possible IOL prediction.

Octopus 600®
Early diagnosis and standard white-on-white perimetry in one device
The Octopus 600, with EyeSuite Progression Platform, extends Haag-Streit’s product range of visual field analyzers, combining the Pulsar method for early glaucoma detection and standard White/White perimetry for long term follow-up in one compact and stand-alone device. Unique fixation control for blinking, pupil position, darting and forehead contact, yields more reliable results, and with our Tendency Oriented Perimetry (TOP strategy) thresholds are performed in 2 ½ minutes.

Octopus 900®
Versatility PLUS connectivity!
The Octopus 900, with EyeSuite Progression Platform, is the most versatile perimeter available. The Octopus 900 features more options for reliable testing, including: static White/White, Blue/Yellow, Red/White, Flicker, Low Vision and computer-assisted true Goldmann Kinetic, TOP Strategy for thresholds in 2-1/2 minutes and our unique fixation control. EyeSuite, the industry’s most advanced software for progression analysis, includes the first perimetric analysis to combine structure and function with real-time interactive access to all perimetric data with easy networking and free viewing stations.

NEUROLENSES®

eyeBrain Medical, Inc. is the innovator behind neurolenses®, the first prescription lenses that add a contoured prism to bring the eyes into alignment. Contoured prism has been shown in studies, to relieve the headaches, neck/shoulder pain and eyestrain that many people experience when using digital devices, reading or doing detail work. Patient satisfaction surveys show 93 percent of patients respond positively to their neurolenses. eyeBrain Medical is headquartered in Orange County, CA.

EYE REFRACT™

Maximize your patient consult time and free yourself to focus on critical tasks by eliminating the 2-step refraction process.

• Consistent and accurate automated refraction, regardless of operator
• Embedded algorithms guide subjective refinement
• Accurate prescription in less than 4 minutes
• Patented dual Shack-Hartmann wavefront aberrometers

Circle No. 84

Fully Automatic Wavefront Lens Analyzer

This wavefront lens analyzer gives you detailed progressive lens analysis and comparison via easy one-click operation. Precise to .01 diopter, the VX40 is the perfect instrument for accurate measurements and patient education.

• Powermap® Wavefront Technology Sensor
• Automatic Lens Type Detection
• Progressive, RX, and Free-form Lens Analysis
• EMR and 3rd Party Device Integration

InflammaDry is the first rapid, in-office CLIA-waived test that detects elevated levels of MMP-9, an inflammatory marker that is consistently elevated in tears of patients with dry eye disease. InflammaDry is easily performed in 4 simple steps, minimally invasive, requires no special equipment, and accurately identifies patients with dry eye allowing for optimal treatment methods.

OCuSOFT Lid Scrub Allergy Eyelid Cleanser

OCuSOFT® Lid Scrub® Allergy Eyelid Cleanser for allergy conditions in convenient pre-moistened pads. Seasonal allergies can cause red, itchy, inflamed eyes and eyelids. Allergy eye drops act to relieve eye symptoms but do nothing to calm the irritated eyelids which are directly related. Removing allergens from the eyelids can provide added relief and reduce the risk of transfer into the tear film. This product also removes oil, debris, pollen and other contaminants from the eyelids while utilizing Green Tea Extract, Tea Tree Oil and PSG-2™ (Phytosphingosine) to effectively reduce redness, inflammation and itching of allergy eyelids.

Detect and monitor AMD with AdaptDx® testing.

- When night vision problems begin
- Three years before drusen are visible
- With 90% accuracy
- Reimbursable using CPT code 92284

MaquiBright®
Clinical trials show maqui berry increases tear production and improves dry eye symptoms.

The iCare® HOME provides a new way to obtain IOP measurements outside the doctor’s office. IOP fluctuates throughout the day and this 24-hour tonometer allows patients to take their own measurements at any time. This added information gives doctors a better understanding of the patient’s IOP and can be advantageous for disease management.
